

ISPyB implementation @ALBA

Trieste – September
13th 2018

Overview

- ISPyB @ALBA
- Current status
- Near future

- Project initiated end 2016 at ALBA.
- Coordination effort among Scientists, Control Systems and MIS sections.
- Scope:
 - Deploying ISPyB
 - Deploying MXCube
 - Integrating both on BL13-XALOC (MX).
- First prototype ready at the beginning of 2018
- Production environment has been recently deployed.
 - Final testing and sign off to be done after acceptance.

- No merges from the code since mid 2017 (v. 5.0.2).
- Changes applied:
 - Aesthetic: including ALBA's logo.
 - Adapted paths changes: applied ALBA's site clause (e.g. `SITE.IS_ALBA...`)
 - Autoproc and Edna.

- ISPyB ALBA code consolidation when the system is fully operational (Expected end 2018).
- Pull request on master branch in order to have all the code of the collaboration updated.

ISPyB @ALBA

Thank you
