

Status of ISPyB at HZB

Alexandra Kastner

14. September 2018

Current status

Installed a working testsystem

→ Debian 9 / MariaDB / Wildfly 8.2.1

Added HZB profile and site-specific modifications

Using LDAP for authentication

- login for normal user works
- roles have to be implemented
- currently working on HZBLoginModule.java

Next steps

Webservice for retrieving userportal data

- specify required data, so GATE developers know what to provide
- will be read-only views from GATE's Oracle database

Switch user accounts from NIS to LDAP

- re-configure all computers in MX-offices and terminalroom

Connect with MXCuBE

Outlook

EXI

Dockerize and run ISPyB as Docker container
